

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, after conducting research, the researcher concluded and provided suggestions

5.1 Conclusions

Based on the results of the previous research and discussion researcher concluded that on the competency test microteaching performance. the student's 8 teaching skills overall marks result are 9.28% bad, 52.4% good, and 38.3% very good. With the individual and grouping skill at 11.7% of students mark with “bad”, and with discussion skill at 64.3% marked “good” and 21.1% marked “very good”.

5.2 Suggestions

Based on the results of the discussion of the conclusions above, researcher provided some suggestions as follows.

1. Students need to improve strategies to better map their learning session by ask for their advisor or even peer when performing microteaching
2. Students can also record their practice teaching and self-reflect on what they should improve
3. Try to include all teaching skills when performing microteaching and improve their style when using 8 teaching skills in microteaching especially grouping students for discussion or other activities
